

The Aegis Sciences Corporation Test Menu with 2025 Medicare Fee Schedule contains descriptions of tests offered by Aegis along with applicable testing methodology, procedure code(s) (HCPCS and CPT), and the 2025 Medicare Clinical Laboratory Fee Schedule payment rate. The following notes will assist in reviewing the coding information in this document.

- For definitive drug tests, Medicare only recognizes the HCPCS tiered codes G0480-G0483. Accordingly, AMA CPT procedure codes associated with definitive drug tests are not utilized herein.
- Medicare coding rules require the use of the drug classes established in the AMA CPT Manual for purposes of determining the appropriate HCPCS tiered code for definitive drug testing.
- The recognized drug classes and HCPCS code descriptors are summarized in the tables below these notes for reference.
- Within this test menu, when the Aegis definitive test name is not the same as the AMA CPT drug class descriptor (typically in situations where the CPT drug class name does not provide sufficient clarity or specificity to describe the offered test), we have included the associated CPT drug class descriptor in parentheses next to the Aegis test name for ease of reference.
- Please refer to the AMA CPT Manual for additional information on drug classes and individual drugs within each class.
- Medicare utilizes CPT procedure codes for all other tests offered by Aegis. Accordingly, the applicable CPT code is associated with these tests within this test menu.

HCPCS Procedure Codes – Definitive Drug Tests**	
HCPCS Procedure Code	Short Code Descriptor
G0480	1-7 drug class(es)
G0481	8-14 drug classes
G0482	15-21 drug classes
G0483	22+ drug classes

**Definitive testing charges will be determined based upon the total number of definitive tests performed. Only one HCPCS code will be utilized per patient per date of service for definitive testing.

Drug Classes (reference the AMA CPT Manual for additional information)	
Alcohol(s)	Heroin metabolite
Alcohol Biomarkers	Ketamine and Norketamine
Alkaloids, not otherwise specified	Methadone
Amphetamines	Methylenedioxyamphetamines
Anabolic steroids	Methylphenidate
Analgesics, non-opioid	Opiates
Antidepressants, serotonergic class	Opioids and opiate analogs

Antidepressants, tricyclic and other cyclicals	Oxycodone
Antidepressants, not otherwise specified	Phencyclidine
Antiepileptics, not otherwise specified	Pregabalin
Antipsychotics, not otherwise specified	Propoxyphene
Barbiturates	Sedative Hypnotics (nonbenzodiazepines)
Benzodiazepines	Skeletal muscle relaxants
Buprenorphine	Stereoisomer (enantiomer) analysis
Cannabinoids, natural	Stimulants, synthetic
Cannabinoids, synthetic	Tapentadol
Cocaine	Tramadol
Fentanyl	Drug(s) or substance(s), definitive, qualitative or quantitative, not otherwise specified
Gabapentin, non-blood

*Presumptive positive testing results will reflex to definitive testing using mass spectrometry or other definitive test methods. Only one presumptive testing code may be billed per day. This code will not be billed if presumptive testing is already performed for same date of service.

**Definitive testing charges will be determined based upon total number of definitive tests performed. Only one HCPCS code will be utilized for definitive testing.

***Positive methamphetamine results will reflex to methamphetamine D/L Isomer testing.
